

This correspondence is to inform the Federal Election Commission that the DRIVE Committee was late in filing the October 2008 Report due October 20, 2008. DRIVE electronically files reports to the FEC using VOCUS software. The DRIVE Committee FEC report was launched to e-file but failed to generate and file the report. Upon contacting our software vendor, we were informed that VOCUS verified that the connection to the FEC server timed out and therefore, the DRIVE report was not filed timely with the FEC. The DRIVE report was successfully filed on October 21, 2008. Thank you for the opportunity to provide this information.
